### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 and 6-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Krzysik et al. (6,534,074).

Krzysik discloses an absorbent article having an absorbent body and a cover with a fluid-pervious surface layer and a fluid-impervious surface layer, as described in column 2, lines 4-9. The fluid-pervious surface layer comprises an impregnation, as disclosed in column 3, lines 39-50, the impregnation being a composition that comprises a hydrophilic organic solvent having a low vapor pressure at room temperature, as disclosed in column 9, lines 45-64.

With respect to claims 2-4 and 6, the organic solvent is propylene glycol, as disclosed in column 9, lines 59-60, which has a vapor pressure less than or equal to 1 mm Hg at 40 degrees C, and a high oxygen content of at least 30%.

With respect to claims 7 and 8, the impregnation further comprises a lactic acid, as disclosed in column 9, lines 56-57.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Krzysik et al. (6,534,074) as applied to claim 1 above, and further in view of Kraskin (3,935,862).

Krzysik discloses all aspects of the claimed invention with the exception of glycerol. Kraskin discloses in column 4, lines 51-54, glycerol as being an art recognized equivalent of propylene glycol when used for skin treatment in conjunction with absorbent articles. It would therefore be obvious to one of ordinary skill in the art at the time of invention to use construct the article of Krzysik with glycerol, since the examiner takes official notice of the equivalence of glycerol and propylene glycol for their use in skin treatments, and the selection of either one would be within the level of ordinary skill in the art.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent 6,709,941 pertains to absorbent articles having a surface layer impregnated with a hydrophilic organic solvent.
